

BANGOR WHIG.

MONDAY, JULY 29, 1839.

OUR CREDITS.
NO. 51, U. S. TREASURY BANK,
BOSTON.—IN THE EXPENSES OF THE
GOVERNMENT.
RECEIVED, the 26th, the Treasury, and the Post Office
AMINISTRATION OF THE RESIDENT'S PATRONAGE, BY MAKING MORE OFFICERS
BY ELECTIVE BY THE PEOPLE, &
DOFINISHING THE PATRONAGE OF THE STATE
EXECUTIVE IN THE SAME WAY
Appointed by the Secretary of the Treasury and the
Post Master General by Congress, and the
Post Office by law of the interference of Officers
of the Federal Government in Popular
Elections

THE citizens of Sangerville, as appears by the Piscataquis Herald, from which we take the following request, have been favored with a fine specimen of the power of party leaders in appointments to office, in the appointment of a Post Master at that village. If the facts are fairly represented by a correspondent in the Herald, Amos Kendal cannot be a minute too quick in removing the man he has placed in that station and appointing another, nor can the 'Doux de BLAUNCH' be too quick in asking pardon of the people for all the wrongs of soul.

The opinion which many of the citizens of Sangerville entertain of the Post Master, may be learned from their request, which we publish.

A number of these persons are attached to the locofoco party, and if they dont get sick of their company, and the practices of their leaders, before long, they have stronger stomachs than we ever wish to possess. The press throughout the State should circulate, and comply with the following request of the good people of Sangerville.

Whereas the Post Office in this town has been entrusted by the appointing power, to the care, and placed under the control of an individual, who we believe is incompetent to discharge the duties of the same in a safe, appropriate and acceptable manner, therefore we the undersigned request that all pamphlets, magazines, news papers, packages and letters, and every thing else, sent to our address by mail, may be directed

GUILFORD,

Piscataquis County.

Sangerville, July 16, 1839

Byram, John Herris, Joseph Pettengill, John Ordway Jr., Henry Scwall Jr., Asa Thompson Jr., Simon Sheld, Benjamin Ellis, Moses Carr, Barber Bursley, William G. Clark, Peter Staples, Stephen Lowell, John Goff, Samuel M. Scwall.

It is well known that Jefferson long since predicted that the "federalists" in order to deserve the people, carry their points, and effect their purposes, would take the name of democrats. The Roanoke Advertiser remarks that the prediction has been fully verified. Buchanan who declared "if he had one drop of "publican blood in his veins he would let it out" is now a Van Buren Democrat. So also is Lazarus, who said "if he had lived during the Revolutionary War he would have been a Tory." He is now, a Van Buren Democrat, also. And in this State there is R. P. Duklar, the "Young Tim Pickering," who calls himself a genuine Democrat, and Reuel Williams, is now democratic to the back bone; and hosts of others of less note, yet figuring as leaders of the self-styled democratic party, boast of their pure, unadulterated and undiluted democracy. We would caution the people to be aware of wolves in sheep's clothing.

It is the opinion of Mr. Emmons, the geologist of New York, that peat may be used in the production of gas light. It contains carbonated hydrogen in great abundance, is less expensive than the gas manufactured from coal and oil, and is quite inoffensive, in which respects it presents a great advantage over the gas in common use. The substance after being employed for this purpose, may be burned as fuel. During one of the voyages of the Great Western steam ship, an experiment was made testing its fitness for steam engines, when it was found that in combination with a small quantity of tar, it produced a broad and intense flame, which excited very much in the general use of gas.

THE 1st of the gentleman in New York who was arrested in an unlawful intercourse with Mrs. McGehee, (as account of which was published in Saturday's daily) is John Atkinson. An action for damages and expenses was brought against the offender by the wife, for damages laid at one thousand dollars, and that in aid of McGehee's procuring her wife three thousand dollars at first required, he will be compelled to procure justly in aid of further sum of twenty thousand dollars.

SCISSORS

The following pretty compliment to women was given as a toast on the Fourth in New Jersey. "There's a purple half to the grape, a melon half to the peach, a sunny half to the globe, and a better half to me" in Raleigh (North Carolina) Register says, "There is now living in this county a man named Arthur Wall, who is one hundred and nineteen years of age, and who is in the enjoyment of good health and spirits. There is also a negro man, supposed to be about one hundred and twenty, fifty years of age. A young man applied at the office of the New York Dispatch, on Tuesday, to ascertain the cost of inserting a marriage notice, but upon ascertaining the "fee" would be two shillings, concluded to postpone his marriage nuptials for the present. A sea-faring man has been arrested in Baltimore, suspected of having stolen the box of dowlloons from the packet ship Duchess of Orleans at New York. A gentleman named M. Daniel, residing at Cowtown, (Md) was bitten in the arm by a mad dog on Thursday week last. He was not aware at the time that the dog was rabid, but examining it on the following day, he applied for surgical aid, and had the parts bitten cut out and cauterized. The New Hampshire Whig states that, the bills of the Essex bank Guildhall, Vermont, are good for nothing. A letter from the northern part of Oxford county says, "We have here now one of the most growing seasons ever experienced. Grass, grain, corn, every thing is luxuriant in the extreme alternate sunshiny and stormy." While the President was at Sing Sing a few days since, three of his partisans so far demeant themselves as to kiss his hand. Another held an umbrella over the President's head while he walked to the boat.

THERE ARE MORE ROGUES BESIDES SWARTWOUT

The Van Buren paper in this town asserts that when the party discover a dishonest or incapable public servant, he is promptly and unhesitatingly dismissed, discarded and disgraced. That the public may see how little credit is to be attached to the statements of the Democratic whether emanating from the publisher, or his friend at his elbow, we have but to refer to one or two cases of default. First in the case of Harris, the receiver of public money at Columbus, Mississippi. A correspondence, as shown by the official documents of the Secretary of the Treasury, will show that as many as eighteen letters were addressed to him by the Secretary, reminding him of his robbery and begging him to "pony up, if not all, a part of what he had stolen." Harris replies, he equivocates, beguiles, misleads, and finally says "the wot, and he cant, and he shant." During the correspondence which began March 1834, and ended in November 1836, almost three years, the Hon. Mr. Claiborne, member of Congress, in Harris' hall, informs the Secretary in a letter dated September 15, 1835, that Harris is one of the main pillars of the democratic cause, and one of the earliest and most distinguished friends of the administration in Mississippi. His family and all of them are co-operating with us in the arduous struggle which we are now making. They are true democrats, and the bank, nullifying and White parties would shout victory at any blow aimed at them. We are now in the midst of an electioneering campaign. Governor and Runnels, R. Walker, Major Edwards and myself from the Van Buren ticket, and it will be a close contest. This letter had the effect desired. Harris never was removed, but continued in office a year afterwards and finally resigned. The balance due from this man to the Government was One Hundred and Nine Thousand, One Hundred and Seventy Eight Dollars. Notwithstanding all this, Harris, instead of being "disgraced" by the Secretary, had the unblushing impudence to recommend a Colonel Boyd as his successor, who was forthwith appointed. The next case, is that of his very Colonel Boyd himself. Finding his predecessor got off so handsomely, he concluded to try his hand at the game. Accordingly it was soon found out that he was stealing what little Harris had left, and a travelling attorney, V. M. Garash, was sent out to examine and report upon the state of the office. Garash, under date of June 13, 1837, writes to Woudbury as follows: The account of Boyd which I have made out and herewith transmit, presents a balance a grant him of \$35,965. But the man seems really penitent, and I am inclined to think him honest, and has been led away from his duty by the example of his predecessor, and a certain looseness in the code of morality, which here does not move in so limited a circle as with us at home. Another receiver would probably follow in the footsteps of the two. You will therefore be surprised if I recommend his being retained, for he has his hands full now, and will not be disposed to defalcate any more. His final deficit was \$60,900. Here we are the solicitor instead of advising the department to kick the rogue out of office neck and heels, actually recommending him to mercy. First because he seemed sorry for what he had done. Second, because he was corrupted by the example of Harris. Thirdly, on account of the looseness of the moral code in the South, when compared with that at the North. A pretty compliment truly to Southern honesty, by our enemies from the land of wooden nutmegs. And lastly, as he had his pockets full, he would not steal any more.

We ask the people to discard their party prejudices and calmly reflect upon these things. We ask you, for once at least, to forget party, and think of your country. Sacrifice all other feelings upon the altar of patriotism. Drive out the money-changers and usurers from the sacred temple, which they have so long polluted, and rescue the valued institutions bequeathed us by a brave and gallant ancestry, before it be too late. Roanoke Advocate.

LAWYERS. The Oswego Palladium makes the following sensible remarks about the profession of the Law. "The time was in our country when the profession of the law of itself conveyed consequence and respectability. In the older states the lawyers chiefly belonged to what was regarded as the highest circle of society, and with but very few exceptions, were men of the very best education the country afforded. To be lawyer then, was to be something of itself. That time has gone by and the personal consequence of the lawyer, as it ought, rests upon him—him. To be respected he must be eminent, and to be eminent he must be the hardiest working man in the community. A niggard or poor lawyer is like a middling merchant or mechanic, and is not of a jot more consequence in society than either."

MONEY WELL LAID OUT.

"No money is better spent than that laid out for domestic satisfaction. A man is pleased that his wife is dressed as well as other people, and the wife is pleased that she is dressed." So said Dr. Johnson, and Uncle Major, as Bowell's rather called him, was right. Every husband who knows any thing of his privileges is proud of his wife, for some reason or other. Her very faults, if not too grievous and insupportable, recommend her to him, or to say the least, he would be at a loss without them. There is your notable scold for instance, other people wonder how the poor husband lives with her, & he, all the time ignorant of their conmiseration, is congratulating himself upon having a neat, smart and capable woman for a wife. Scolding women are always invariably good housewife's prudent women and good managers. We do not mean to say that such virtues are necessarily alloyed with an ungracious tongue, but that the fault is well done without the virtues we have enumerated.

On the other hand, sleek women are almost always affectionate. While she toils—the husband to death with her remissness and neglect of what are manifestly her duties, he knows at the same time that nobody can regret the pain she gives him, more than she herself regrets it. Not however to go into too extended or too critical a review of women's faults and virtues it is a fact that there is hardly a wife in the world who has not some particular virtue to recommend her to her husband. His course if he is wise, is to put the best foot forward, and make the most of the good he possesses in his wife.

He must remember Johnson's remark that no money is better spent than that laid out for domestic satisfaction, and study to humor his wife in as many of her wishes and whims as he can prudently.

In that way, while he pleases both her and himself, he lessens the extravagance of her desires and wishes, for it is only when we are not sure that we can have a thing that we earnestly crave it.

N Y Dispatch.

INTERESTING ACCOUNT OF MALTA AND THE MALTESE.

The case with which mere animal life may be sustained in Malta, tends to encourage early marriages, and according to Mr. Badger's report this barren rock is more densely populated than even the most favored country in Europe. The same extent of surface, he observes, which in England supports one hundred and fifty two souls, contains in Malta nearly eight times that number. This case is shown in a saying common there, that a man may dine on fish, flesh and fowl for a half penny, and this is not so extravagant as might be imagined. The difficulty is to get the half penny. The necessities and luxuries of life are so cheap and money so scarce, that a shop keeper will not refuse to sell some portion of cooked meat for even a single grain, the sixth part of a half penny. What toil and exertion are often gone through to obtain that single grain is known to every one who has chanced to put foot in the port of Valletta. There are bays and we believe men, who gain a living by diving for oysters and shell fish, or articles which may have fallen or been thrown overboard from vessels. No sooner does a vessel arrive, than a boat load or two of these naked striplings come under the stern, and there they will remain through a summer's day, throwing up their arms and bobbing down their heads to induce the lookers on to toss over a half penny, accompanying their significant gestures with "bene" for a dive, captain here for a dive. The moment the miserable coin is thrown over a whole shoal of them instantly plunge headlong after it, and one or other never fails to make a prize of it long before it reaches the bottom, and eager struggles may often be seen at considerable distance under the water, as to who shall retain the spoil. This is a sport of sport and pastime at other places, but at Malta it is a trade. From a little luck in this way does many a Maltese boatman live, and this in turn gives him a living.
